kevin-portfolio-taupe.vercel.app

Computer Science undergraduate building backend, systems and verifiable digital infrastructure. Work spans bounded MCP service execution, payment evidence, testnet smart contracts, cloud delivery, operating-system internals and low-level memory management.

SELECTED ENGINEERING WORK

LaunchProof

2026 · TESTNET

Built a fail-closed MCP service rehearsal system that settles configured x402 test payments and publishes canonical evidence to an X Layer testnet registry.

- Separated on-chain proof authority from PostgreSQL indexing/cache and implemented five explicit verification gates.
- Used Next.js, TypeScript, Express, Prisma/PostgreSQL, Solidity, MCP and containerized cloud infrastructure.

Wardens Protocol

2026 · CASPER TESTNET

Implemented a five-agent RWA verification loop where x402-paid verifiers can be challenged and dishonest reports can trigger bond slashing and zero LTV.

- Repository documents 12 passing contract tests and eight testnet demo transactions.
- Used Rust, Odra, Casper, TypeScript, Bun and Next.js across contract, orchestrator, agents and dashboard.

NitroGate

2026 · WEB3 STREAMING

Created a pay-per-second video-streaming architecture using Yellow Network state channels, Circle CCTP liquidity movement and ENS creator identity.

- Kept high-frequency accounting off-chain and reserved the chain for session open/close settlement.

EZOS

SYSTEMS STUDY

Built a small 32-bit operating-system study in C and x86 assembly with boot/kernel code, paging, IDT, disk access, filesystem path parsing and an aligned block-table heap allocator.

TECHNICAL CAPABILITIES

Backend & APIs

TypeScript, Node.js, Express, Java, Go, REST, MCP

Systems

C, x86 assembly, heap allocation, paging, SDL2, QEMU

Data & delivery

PostgreSQL, Prisma, JDBC, SQL, Docker, Azure Container Apps, Vercel, GitHub Actions, Linux

Blockchain & agents

Solidity, Rust/Odra, X Layer, Casper, x402, Yellow Network, Circle CCTP, ENS, agent orchestration

Frontend

React, Next.js, TypeScript, Tailwind CSS, accessible responsive UI

EDUCATION

B.E. Computer Science and Engineering

Loyola-ICAM College of Engineering and Technology

2023–2027 · Chennai, India

Project claims are intentionally scoped to repository evidence and testnet boundaries. No employment, client, award, user or revenue claims are included.
